Icinga Fundamentals Training

Jesús Arley Quirós

attended the above mentioned training on April 17 to 20, 2023.

This training provides the basic knowledge for the basic use and configuration of Icinga 2 and Icinga Web 2 in combination with the Icinga Director. Various operating systems and network devices are monitored, many different types of checks are handled and notifications, dependencies and business processes are created for them.

TRAINING CONTENT

- Basic introduction to Icinga 2, Icinga Web 2 and the Icinga Director
- Basic configuration and practical examples
- Rule-based configuration with Icinga 2
- Understanding and using Check Commands
- Linux and Windows Monitoring with Icinga 2 Agents
- Exemplary monitoring of network devices using SNMP
- Configuration of notifications and escalations
- Integrated troubleshooting options

All topics were covered within 4 days. The individual training units consist of a balanced mix of theory and practice, whereby the lessons are supplemented by hands-on exercises.

Blerim Sheqa, COO, Icinga GmbH | February 20, 2023
